LOBSTER HANDS

Shahbaz Ali Khan, Munir Ahmad Abbasi*

Department of Neurosurgery, *Department of Pulmonology, Ayub Medical College, Abbottabad, Pakistan

A 32 year old male presented with bilateral symmetrical cleft hands (Lobster Hands). The gentleman was able to perform most of his daily activities with ease. There was no family history of this condition or any other congenital skeletal anomalies. His feet were normal. Reconstructive surgery was recommended which he declined.
